

Introduction of zinc sulfide made in China

【Features of this product】

*Point 1: Modified resin in China Currently being sold to China's largest company.

Adopted as an additive for PA, PC, PP, and PPE resins.

*Point 2: The procurement of zinc oxide and sulfuric acid as raw materials is completed within the same China.

In the future, the supply chain will be unified for stable supply.

*Point 3: Due to supply concerns from European manufacturers, the production volume is being increased,

The company has a 70% market share in China.

【Spec】

item	Spec	actual value
Appearance	white or yellow powder	white or yellow powder
purity(%)	≥ 97	98.3
Ignition loss (%)	< 1	0.76
Particle size (D50) μm	1-2	1.3

***The particle size can be adjusted according to the customer's requirement.**

【Others】

Packing: 25kg BAG, 1MT BAG

Plant equipment

Warehouse in the factory
